

magic touch™

The smooth operator...

Smooth and sophisticated, the magic touch™ wardrobe is not only effortless to use, it is defined by gentle curves that will complement any room of your home.

CAPRAL

magic touch™

The soft, rounded slimline frame is available in a range of anodised or powder coat colours to suit your décor requirements.

The magic touch™ wardrobe is a smooth operator. Choose from the option of safety mirrors (in compliance with AS1288-2006) or from a wide range of plasterboard or solid infill panels.

- Safety mirrors create a lighter and more spacious feel to your room.
- Or choose infill panels to match your room's walls or add a feature to your room.

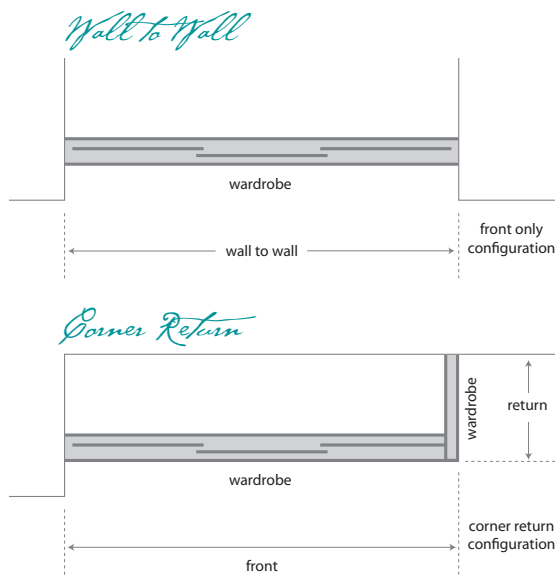

The choice is yours, allowing you the flexibility to give your bedroom the makeover you desire.

With one simple touch, the magic touch™ wardrobe glides back and forth on concealed acetal resin rollers. These are easily adjustable at installation to ensure trouble free and low maintenance operation for years to come.

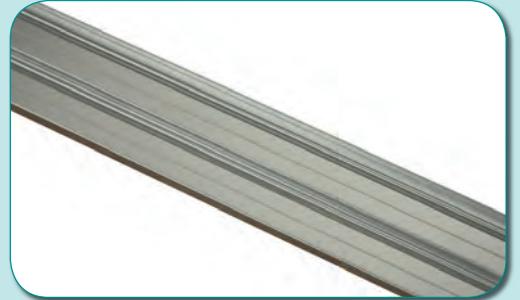

Integrated rubber bumpers also allow you to quietly and gently close your magic touch™ wardrobe door. The handle, which is 3mm, is easy to use and unobtrusive in its design.

The flat bottom sill profile makes the frame less obtrusive and is particularly suitable for walk-in robes. Choose from the option of a groove sill for a smooth run, or a track sill so that dirt and grit don't interfere with the wardrobe's operation.

The wardrobe is available in two, three and four panel configurations on a double track sill to suit the requirements of your room. The magic touch™ wardrobe doors can also be installed wall to wall or corner return. Please see our diagrams below.

Features include:

A flat bottom track that is less obtrusive

Rubber bumpers for quiet operation

Acetal resin rollers for smooth operation
